

Public Protection Bulletin

10th June 2022

Dear colleague,

Nearly all public health protection measures have been removed but COVID-19 remains a risk, especially for vulnerable people. For the foreseeable future, our member organisations and front-line workers will continue to face significant challenges. As public protection leaders and managers have a responsibility to focus on how we continue to support our staff and volunteers.

As previously reported, our Adult Support and Protection and Child Protection Committees and subgroups have returned to the regular meeting schedules, albeit on video conferencing platforms. We review this on a regular basis to determine when we will be able to meet in person again.

People continue to tell us these bulletins are a valuable source of information and accordingly, we will continue to seek out the latest news and provide electronic links to more detailed articles.

As before, this needs to be a two-way process so please continue to share any interesting news or developments from your particular agency or organisation. We hope you find something of interest to you in the articles below.
