Officers advised that there are ongoing discussions at officer and political level however there is no indication of any change in this regard.

Members questioned whether discussions have taken place with the Council regarding the Budget Support Fund to help the IJB manage its pressures. Officers advised that a meeting is being arranged with the Council's Director of Finance and Chief Executive to discuss the significant financial challenge going forward for the next financial year. The impact of the streamlined Asylum Seeker process will have implications for the IJB and the Council.

In relation to prescribing costs, Members questioned how Officers are managing the upward pressure. Officers advised that they are monitoring the volume and costs across the city although a lot of this is outwith Officers' control as the Global markets drive the price.

Officers will also provide a briefing for all Members following the meeting.

Officers

Members questioned if the complaints relating to staff attitude and competency can be attributed to staff shortages and pressures on staff, and whether there is a consistent pattern. Officers advised that they would look to provide more context in future annual reports on how many of these complaints are upheld to give a clearer picture.

11. Older People Purchased Care Home Capacity & Sustainability

Geri McCormick presented a report outlining the current capacity within the purchased older people care home sector within Glasgow City, the key aspects influencing sustainability of the sector and measures in place to monitor the sustainability of the sector within Glasgow City.

There was a discussion in relation to the 3383 beds registered with the Care Inspectorate, noting that the occupancy doesn't match the available beds. Officers confirmed providers can choose not to have beds available even if they are registered.

ACTION

Officers advised that there are a number of reasons for beds to be out of commission, for example, staffing numbers, building works etc. which can impact on availability of beds. Demand for places can also have an impact as people have a choice on where they go and are more likely to choose a care home that has been modernised. Complexity of need is also a factor and can result in delays in hospital if a specialist nursing resource is required, which may also necessitate additional staff to support the person. Officers highlighted the need to commission more specialist resources to meet this type of demand.

Officers agreed to bring an updated report to Committee with more detail and an explanation of the contributing factors.

Officers

Members highlighted the six Older People Care Home closures over the past two years and questioned if this volume is unusual. Officers advised that when they benchmarked these figures to 2016, the numbers were similar. Officers confirmed they would include details on how many beds have been reduced by the care home closures in the update report.

a) Noted the contents of the report.
