**Meeting Date: Wednesday 23<sup>rd</sup> September 2020**

## **Glasgow City Integration Joint Board**

**Report By:** Stephen Fitzpatrick, Assistant Chief Officer (Older People Services)

**Contact:** Kirsty Orr, Programme Manager

**Phone:** 07805763615

### **REFRAMING AND RENEWAL OF THE GLASGOW CITY HSCP MAXIMISING INDEPENDENCE PROGRAMME**

<b>Purpose of Report:</b>	To update the members of the IJB on the reframing and renewal work underway to support the delivery of the Maximising Independence Programme and seek their endorsement of the key requirements identified to support continued progress and momentum.
---------------------------	--

<b>Background/Engagement:</b>	As per <a href="#">26 June 2019</a> IJB report referenced in main body of this paper.
-------------------------------	---

<b>Recommendations:</b>	<p>The Integration Joint Board is asked to:</p> <ul style="list-style-type: none"><li>a) Note progress to date;</li><li>b) Support our renewal and reframing plans for Maximising Independence;</li><li>c) Endorse the recommended key requirements to ensure programme delivery and momentum</li><li>d) Note the proposed resumption of routine progress reports to the IJB; and</li><li>e) Support the development of singular approach for the HSCP's digital infrastructure and inclusion strategy through the Maximising Independence Programme.</li></ul>
-------------------------	---

## OFFICIAL

### Relevance to Integration Joint Board Strategic Plan:

The Maximising Independence Programme is intended to give effect to key elements of the Strategic Plan, including those in relation to shifting the balance of care, promoting independence and achieving budget balance.

### Implications for Health and Social Care Partnership:

#### Reference to National Health & Wellbeing Outcome:

Outcomes 1, 2, 3, 4, 6, 7 & 9.

#### Personnel:

The programme will develop proposals to invest in staff capacity and culture change to support a different way of working for staff, patients and service users to achieve the objectives of the approach.

#### Carers:

As per 26 June 2019 IJB report, it is envisaged this programme will result in an increasing contribution from families and carers, particularly in relation to low level needs that do not meet social work eligibility criteria. Potential new models of care around family support may also impact on the carer role in future.

#### Provider Organisations:

This programme acknowledges an increasing role for housing associations and third sector organisations around prevention and early intervention.

#### Equalities:

A high level EQIA has been undertaken to provide a baseline assessment at the start of the programme. This will be an ongoing process.

#### Fairer Scotland Compliance:

Any relevant implications from this paper in relation to combating the impact of socio-economic disadvantage within the city will be identified in the EQIA with appropriate mitigations put in place.

#### Financial:

£8.5M identified and approved by IJB from 2020/21 budget under spend to fund proposals and investments to support the delivery of the Maximising Independence Programme over two years (2020-2022).

Proposals developed as part of the Maximising Independence Programme are associated with the £4.2M balance of care saving approved as part of the

	2019/20 IJB budget and £4.3M as part of the 2020/21 IJB budget.
<b>Legal:</b>	Any changes emerging from this programme will be consistent with the HSCP's statutory duties.
<b>Economic Impact:</b>	None
<b>Sustainability:</b>	None
<b>Sustainable Procurement and Article 19:</b>	There are likely to be procurement considerations in relation to the future funding of neighbourhood-level prevention and early intervention initiatives associated with this programme.
<b>Risk Implications:</b>	A risk management framework will be developed to support the programme of work.
<b>Implications for Glasgow City Council:</b>	The Council can expect some political challenge in relation to changes to the future HSCP offer in relation to adults and older people's care. This programme is also associated with delivery of significant council savings.
<b>Implications for NHS Greater Glasgow &amp; Clyde:</b>	As provider of last resort the NHS can expect to experience higher levels of demand should this programme fail to deliver the desired reduction in overall levels in demand for adult and older people's social care.

**1. Purpose**

- 1.1. The purpose of the report is to update the members of the IJB by outlining the current position and planned next steps to support the successful delivery of the Maximising Independence Programme. This plan has been developed within the context of system-wide recovery planning processes.

**OFFICIAL**

## OFFICIAL

### 2. Background

- 2.1 On [26 June 2019](#) the IJB approved the development of a Maximising Independence programme for Glasgow City.
- 2.2 The programme of work commenced in September 2019 with monthly seminars held with key stakeholders. A co-design approach was used to create a shared purpose for transformational change across systems.
- 2.3 As a result of the HSCP and system-wide response to the Covid pandemic all transformational programme activity was paused from the start of March 2020 to prioritise operational delivery of essential services. Services have been dealing with the impact of the virus and found new and different ways of working to keep the city supported. A number of these initiatives have progressed the principles and objectives of the Maximising Independence Programme. These include reducing front door activity and developing digital solutions to support patient and service user care; e.g. Attend Anywhere.
- 2.4 As the programme activity resumed in June, partners agreed it was essential that the reframing and renewal planning for Maximising Independence was informed by our combined learning from the recovery planning processes across the wider system, including Acute, third, independent and housing sectors.

### 3. Maximising Independence Programme Progress

- 3.1 A vision statement for Maximising Independence has been developed through a co-design process with programme board members, which seeks to describe our shared aspirations and ambitions. This vision as currently drafted is:

*“Glasgow can be a city where everyone will achieve their full potential for health, well-being and resilience”*

A strap line for the programme vision has been developed as:

*Developing Glasgow’s Communities’ Health, Well-being and Resilience*

- 3.2 The Programme Board has also developed a mission statement to describe what partners will do to give effect to the vision:

*“Working alongside individuals, carers, communities, local organisations and partners we are moving on from traditional ways of providing services with the intention of enabling people to live the best lives they can by sharing decision-making about their care.*

*Reducing inequalities in health and well-being outcomes is core to our mission, as is promoting individual resilience and minimising the unnecessary presence of formal health and care services in their lives.”*

## OFFICIAL

- 3.3 The HSCP has commissioned an external company to undertake research which will test the vision and mission statements as well as other key messages with the public. The research will also explore the specific impacts of the Covid-19 pandemic on changes in public attitudes and behaviours in relation to accessing statutory health and care services.
- 3.4 An initial priority has been to work collaboratively to develop a culture of trust within the Programme Board and create a set of shared principles describing how partners will work together. Membership of the Programme Board also prioritises links to related transformation agendas in Realistic Medicine and Unscheduled Care and seeks to ensure cohesion of approach, shared thinking and resources (see Appendix 1).
- 3.5 Pre-lockdown, through a co-design process members of the Programme Board identified five key areas of focused work that would structure the transformational activity under Maximising Independence:
- Reduce Health Inequalities and Improve Health Overall
  - Workforce and Culture
  - Communities
  - Changing the Nature of Care Delivery
  - Communication and Engagement

Appendix 2 provides an overview of each of the work stream areas and the work stream leads.

## **4. Key Requirements to Ensure Programme Delivery**

- 4.1 Following the pandemic interruption the Maximising Independence programme is moving from 'the what' to 'the how' stage, with a focus on implementing substantive change under each of the 5 work areas.
- 4.2 The workstreams are accountable to the Maximising Independence Programme Board and are required to meet on a 4 weekly basis. Workstream leads will be responsible for providing highlight reports which will: provide an update on progress of the work plan; identify anticipated and actual delays and the identified steps being undertaken to resolve; and, outline the next steps for the work. These reports will be submitted to the Programme Board.
- 4.3 Each workstream has identified initial key priority actions which will be the immediate focus of their work plans. Start-up meetings have been arranged with all leads to ensure that all work streams have commenced during July and August 2020.
- 4.4 To ensure programme deliverables are achieved work stream leads and group members have been given organisational permission to prioritise Maximising Independence work and to protect diary time for this purpose. This is intended to protect against drift in the face of daily events and short-term demands.

## OFFICIAL

## OFFICIAL

- 4.5 It is anticipated that the recruitment for Maximising Independence Programme support will be completed by end September 2020. This support includes Planning and Programme Management, Project support, Organisational Development support, Communications support, including graphic design and Partnership management support from the Third Sector. This team will provide dedicated support, advice and expertise across the programme of work as well as driving activity under each of the 5 work areas.
- 4.6 A Maximising Independence strategy paper will be developed over the next three months to provide an overview of the strategic approach and framework which will underpin this work.
- 4.7 Prior to lockdown the IJB requested regular progress reports on Maximising Independence. The intention would be to resume those reports to provide routine updates on the emerging detail of the work and the overall strategy.

## 5 Other considerations – Digital Infrastructure and Inclusion

- 5.1 Digital enabled care solutions continue to keep people healthy and safe at home. As a consequence of our response to the pandemic a number of services have also altered how they assess their patients and services users and have secured digital solutions to do this.
- 5.2 A digitally connected population will be integral to the success of Maximising Independence by supporting continued engagement and participation in our health and social care transformation programme.
- 5.3 Given the impact of poverty and wider inequalities the programme will seek to resolve issues around digital exclusion; for example, through the provision of equipment and training opportunities.
- 5.4 In addition a robust digital infrastructure requires to be in place to support evolving digital solutions and connections across the health and social care system. The Maximising Independence programme is therefore proactively engaging with the wider digital infrastructure transformation programmes in the city to ensure due weight is attached to health and social care priorities.
- 5.5 The programme will seek to develop a singular approach that coheres all of the above elements of the HSCP's digital infrastructure and inclusion strategy.

## 6 Recommendations

- 6.1 The IJB are asked to:
- a) Note progress to date;
  - b) Support our renewal and reframing plans for Maximising Independence;
  - c) Endorse the recommended key requirements to ensure programme; delivery and momentum;

## OFFICIAL

## **OFFICIAL**

- d) Note the proposed resumption of routine progress reports to the IJB; and
- e) Support the development of singular approach for the HSCP's digital infrastructure and inclusion strategy through the Maximising Independence Programme.

**Maximising Independence Programme Board - Distribution List**

<b><u>Name</u></b>	<b><u>Organisation</u></b>	<b><u>Designation</u></b>
Susanne Millar	Glasgow HSCP	Interim Chief Officer, Health and Social Care Services
Sharon Wearing	Glasgow HSCP	Chief Officer, Finance and Resources
Stephen Fitzpatrick	Glasgow HSCP	Assistant Chief Officer, Older People (South)
Jackie Kerr	Glasgow HSCP	Assistant Chief Officer, Adult Services (North West)
Kirsty Orr	Glasgow HSCP	Programme Manager – Health and Social Care Out of Hours Services and Maximising Independence
John O'Dowd	NHS Greater Glasgow and Clyde	Consultant in Public Health
Fiona Moss	Glasgow HSCP	Head of Health Improvement and Inequality
Alison Noonan	NHS Greater Glasgow and Clyde	UCC Improvement & Development Manager
Olga Clayton	Wheatley Group	Group Director of Housing and Care
George McGuinness	Community Representative	North East Glasgow Locality Engagement Forum
