## 1. Purpose

- 1.1 To provide the IJB with background information in relation to regional planning arrangements and to agree the Chief Officer's engagement with this on behalf of the IJB.

## 2. Background

- 2.1 The following narrative has been provided by the West Implementation Lead, the Chief Executive for Ayrshire and Arran Health Board following consultation on the content of the narrative.

2.2 The Health and Social Care Delivery Plan published in December 2016 set out the importance of delivering:

- Better care
- Better health
- Better value

2.3 The Health and Social Care Delivery Plan signalled the need to look at services on a population basis and to plan and deliver services that were sustainable, evidence based and outcomes focussed. We can provide better patient outcomes and more efficient, consistent and sustainable services for citizens through NHS Boards, Integration Joint Boards and other partners working more collaboratively and effectively to plan and deliver services.

2.4 At regional level, the Scottish Government has commissioned Regional Delivery Plans to be developed, encompassing a whole-system approach to the delivery of health and social care for each of the 3 regions (North, East and West). For the West of Scotland this involves planning for the population of 2.7m covered by 5 NHS Boards, 16 Local Authorities and 15 Health and Social Care Partnerships as well as the Golden Jubilee Foundation. The national NHS Boards are also developing a single plan that sets out the national services where improvement should be focused, including, where appropriate, a 'Once for Scotland' approach in areas such as digital services, clinical demand management and support services.

2.5 To take forward the national and regional approach, 5 Chief Executives have been appointed to the role of National or Regional Implementation leads.

### **3. Developing a Regional Plan**

3.1 To progress a Regional Delivery Plan it is essential to link this to national planning for specialist services, local planning within Health Boards and locality planning within Integration Joint Boards to ensure we plan effectively for the wider population. It is recognised and understood that the existing Boards retain their governance responsibilities, however, to achieve this ambition:

- it is essential that Health Boards and Integration Joint Boards across the West of Scotland support a collaborative approach;
- we need to recognise that boundaries cannot be barriers to delivering evidence based outcomes;
- there needs to be transparency in our discussions; and
- we need to accept a collective accountability for the wider population, evidenced through our decisions and actions.

3.2 In taking forward this work, it is important that we are guided by some key principles, namely:

- Maximising health gain
- Anticipation and prevention
- Reducing inequality
- Quality, evidence and outcome
- Sustainability

3.3 This is an evolving process which will be achieved by working together across the different organisations in a whole systems approach to set out the story for the West of Scotland, describing the current challenges and consider the opportunities to transform care models to meet the future requirements of our population and improve health.

#### **4. Recommendations**

4.1 The Integration Joint Board is asked to:

- a) note the report; and
- b) agree that the Chief Officer engages with the West Regional Planning arrangements and keeps the IJB informed of progress.
