

Item No. 8

Meeting Date Wednesday 18th February 2026

**Glasgow City
Integration Joint Board
Public Engagement Committee**

Report By: Karen Lockhart, Assistant Chief Officer, Adult Services

Contact: Dominique Harvey, Head of Planning and Strategy, Children's Services and North East Locality
Liam Herbert, Head of Planning & Strategy, Older People Services & South Locality
Janet Hayes, Head of Planning and Strategy, Adult Services and North West Locality

Phone: 0141 314 6238

Glasgow City HSCP Locality Plans 2026-28 Update

Purpose of Report:	To update the IJB Public Engagement Committee (PEC) on the development of the 2026-28 Locality Plans, including priority actions and associated engagement.
---------------------------	---

Background/Engagement:	<p>At its meeting in November 2025, the PEC received a paper summarising a wide range of City-wide and locality community engagement activities undertaken over the last year, relevant to the development of Locality Plans.</p> <p>In line with the IJB's decision to extend the current Strategic Plan to March 2028, the next Locality Plans to be developed will now align with that to cover the period 2026-28. As recommended by PEC, the timescale for the production of those plans is geared towards publication in April 2026, following approval by IJB.</p>
-------------------------------	---

Governance Route:	<p>The matters contained within this paper have been previously considered by the following group(s) as part of its development.</p> <p>HSCP Senior Management Team <input checked="" type="checkbox"/></p>
--------------------------	---

OFFICIAL

	Council Corporate Management Team <input type="checkbox"/> Health Board Corporate Management Team <input type="checkbox"/> Council Committee <input type="checkbox"/> Update requested by IJB <input checked="" type="checkbox"/> Other <input type="checkbox"/> Not Applicable <input type="checkbox"/>
--	---

Recommendations:	<p>The IJB Public Engagement Committee is asked to:</p> <ul style="list-style-type: none">a) Note the update on the production of Locality Plans 2026-28 and associated engagement activities;b) Note the Draft Locality Plans attached at Appendix 1; andc) Note that final versions of Locality Plans 2026-28 will be submitted to the IJB for approval in March, for publication and implementation in April 2026.
-------------------------	---

Relevance to Integration Joint Board Strategic Plan:	
<p>The GCHSCP Locality Plans are integral to the IJB's Strategic Plan, ensuring that service users, communities and stakeholders across Glasgow City can participate and influence service planning and delivery. As well as informing the content of Locality Plans, relevant feedback from locality plan engagement activities forms part of the ongoing strategic planning cycle, with views gathered through locality engagement activities informing the development of the next Strategic Plan. This ensures a continuous feedback loop between community engagement, locality planning, and strategic decision making.</p>	

Implications for Health and Social Care Partnership:

Reference to National Health & Wellbeing Outcome:	The Locality Plans will support the delivery of all nine national health & wellbeing outcomes.
--	--

Personnel:	There are no direct personnel implications resulting from this report.
-------------------	--

Carers:	Carers continue to be a key stakeholder group in locality planning and are part of the ongoing engagement activity which includes forums, targeted outreach, and surveys – all of which aim to capture feedback from stakeholders.
----------------	--

Provider Organisations:	Representatives of independent and third-sector providers are involved in both the design and delivery of locality-level services, through strategic planning groups, engagement forums and will be invited to ongoing engagement activities throughout the locality-plan development process.
--------------------------------	--

Equalities:	Locality Plans outline the role localities have in helping to progress the vision and priorities outlined in the IJB Strategic Plan, which was subject to EQIA. Any significant areas of
--------------------	--

OFFICIAL

OFFICIAL

	service change referred to within the draft Locality Plans will be subject to an individual EQIA and made available on the GCHSCP website: https://glasgowcity.hscp.scot/equalities-impact-assessments
Fairer Scotland Compliance:	Locality Plans include a number of actions aimed at promoting equality and reducing health inequalities. The plans also set out headline findings from health and wellbeing survey results, including those linked to social health and deprivation.
Financial:	There are no immediate financial implications arising from this paper.
Legal:	Locality Planning is a statutory requirement under the Public Bodies (Joint Working) (Scotland) Act 2014.
Economic Impact:	Effective locality planning contributes to stronger community links, agreed local outcomes, and sustainable service delivery; by aligning available resources. Locality Plans aim to maximise the impact of available budgets, support prevention and early intervention, and contribute to the wider economic resilience of GCHSCP's, and Glasgow City's communities.
Sustainability:	Planning decisions consider environmental and operational sustainability, particularly in the use of local assets and community resources.
Sustainable Procurement and Article 19:	Not applicable at this stage, but future service delivery linked to locality priorities will be procured in line with relevant policies.
Risk Implications:	The priority actions outlined in locality plans align with those set out in the IJB Strategic Plan 2023-28. Any risks associated with delivery and implementation will be escalated as necessary and reported through the Strategic Plan monitoring process.
Implications for Glasgow City Council:	Locality planning aligns with Glasgow City Council's strategic aims around community empowerment, wellbeing, and place-based working.
Implications for NHS Greater Glasgow & Clyde:	The outcomes of locality planning influence how NHS services are configured and integrated at local level. Continued alignment with board-wide service priorities is essential.

OFFICIAL

OFFICIAL

1. Purpose

- 1.1. To update the IJB Public Engagement Committee (PEC) on the development of the 2026-28 Locality Plans, including priority actions and associated engagement.

2. Context

- 2.1. In line with the IJB's decision to extend the current Strategic Plan to March 2028, the next Locality Plans to be developed will now align with that to cover the period 2026-28. As recommended by PEC, the timescale for the production of those plans is geared towards publication in April 2026, following approval by the IJB in March.
- 2.2. The IJB Public Engagement Committee, at its meeting in [November 2025](#), received a paper summarising a wide range of City-wide and locality community engagement activities undertaken over the last year, linked directly or indirectly to the priorities set out in our locality plans. Those engagement activities play a vital role in informing and involving people and communities.
- 2.3. Therefore, while the 2026-28 Locality Plans again provide the opportunity to raise awareness of priority actions for our services, they also provide a platform for ongoing good engagement.

3. Locality Plan Format 2026-28

- 3.1. In response to feedback, we have adjusted the existing format of Locality Plans to:
 - Reduce the detailed narrative in many paragraphs, particularly those that are ultimately signposting people to where they can access further information on service-specific plans.
 - Highlight more prominently the important role of Carers and include a priority to jointly develop a Carer Action Plan to help meet with aspirations set out in the GCHSCP Carer Strategy 2025-28.
 - Have greater recognition of good engagement activities undertaken locally with a commitment to continue those approaches.
 - Have a transparent approach to our planned service actions for 2026-28 (in addition to highlighting progress against current priorities).
 - Incorporate the 3 Locality Plans into chapters of a single document. This will avoid the repetition of identical sections currently seen across three separate documents by allowing that cross locality information to be presented once. A single document will also enable the reader to more easily access the care group information most relevant to them.

OFFICIAL

OFFICIAL

- 3.2. Reference will also be made to the Service Prioritisation programme (*working title*) that GCHSCP is about to commence (as reported regularly to the IJB). For information, a City-wide meeting with representatives of Locality Engagement Forums (LEFs) was held on 21st January 2026 to discuss the proposed approach and methodology for the programme. This will be followed by further targeted engagement sessions.
- 3.3. The timescale for publication of Locality Plans by April 2026 will likely mean that they are unable to set out specific information on the timings of particular service reviews undertaken as part of the Service Prioritisation programme. However, we will ensure that the locality-led engagement activities that follow on from the publication of Locality Plans will provide an opportunity to engage with community representatives about the service prioritisation programme. This will include regular updates to LEF members.
- 3.4. Draft versions of the Locality Plans for 2026-28 are attached at Appendix 1.

4. Locality Engagement following publication of Locality Plans

- 4.1. As stated previously, Locality Plans provide a platform for ongoing engagement, and the opportunity remains for community voices to comment and shape how our priority actions are implemented. The Service Prioritisation programme is likely to be of particular interest to community representatives and be a key feature of local engagement. An engagement plan around this work will be developed as the scope and timeframes for the programme evolve.
- 4.2. More generally, much of the engagement around the content of Locality Plans will be taken through established routes, including:
- Locality Engagement Forums and associated meetings / sessions.
 - Building on the progress made during 2025/26 in maximising community engagement in the North East within the Parkhead Hub; ensuring that local voices continue to inform how the space is used and developed across programmes of work.
 - Links with the Make It Local programme, delivered through Glasgow's Maximising Independence agenda, supporting community-led health and wellbeing activities that strengthen prevention and early intervention.
 - Pop-up engagement at Health and Care Centre locations to seek feedback on people accessing services
 - The ongoing development of the Locality Database in the North West; extending the opportunities for people to participate in GCHSCP engagement, involvement and consultation activities.
 - Linking with targeted engagement work taking place on specific service changes to promote awareness within localities.
 - Continue the ongoing development of a programme of community marketing and networking in the South to strengthen collaboration between the GCHSCP, the third sector, and community partners.

OFFICIAL

OFFICIAL

- Put a greater emphasis on taking our engagement into established community groups, forums, events etc. in order to improve our engagement reach and tap into expertise.
- Ensure the voice of carers is prominent across engagement activities and by influencing the development of a carer action plan to support the implementation of our Carer Strategy 2025-28.

4.3. While the Locality Plans will run over a 2-year period, it is proposed that a stock-take of our engagement activities and feedback is taken after Year 1. The findings of this will be presented to this Committee, including recommendations for any changes or additions to our planned engagement. The timing of that feedback is also expected to be relevant and valuable to preparations for the production of the next IJB Strategic Plan.

5. Recommendations

5.1. The IJB Public Engagement Committee is asked to:

- a) Note the update on the production of Locality Plans 2026-28 and associated engagement activities;
- b) Note the Draft Locality Plans attached at Appendix 1; and
- c) Note that final versions of Locality Plans 2026-28 will be submitted to the IJB for approval in March, for publication and implementation in April 2026.

Foreword

We are delighted to present this Locality Plan, which showcases the key areas of progress and outlines planned actions across our three localities:

- North East Locality
- North West Locality
- South Locality

This is the first time we have brought together information for all localities and care groups within a single document. By doing so, we aim to make it easier for readers to find the details most relevant to their interests and needs.

The priorities and actions set out in this Locality Plan are closely aligned with those described in Glasgow City IJB's Strategic Plan (2023-2028). Our continued commitment is to improve health and care outcomes for all, with particular attention to supporting and protecting people who have additional needs or face vulnerabilities.

We recognise how essential it is to engage with local communities and individuals who have lived experience of accessing our services, along with their carers. Their voices and perspectives are invaluable in shaping our approach and ensuring our services remain responsive and effective.

This Locality Plan sets the stage for meaningful engagement, which will be especially important as we move forward with an ambitious programme to review Glasgow City HSCP services over the next three years. These reviews will help us prepare our services to meet future demands and explore solutions to the significant financial challenges we currently face.

We would like to express our gratitude to our staff for their continued hard work and dedication. We also acknowledge the crucial contributions made by other care providers, third sector organisations and carers, all of whom play an essential role in supporting our communities.

Karen Dyball, Assistant Chief Officer, Children's Services and North East Locality
Karen Lockhart, Assistant Chief Officer, Adult Services and North West Locality
Caroline Sinclair, Assistant Chief Officer, Older People's Services and South Locality

Introduction

Glasgow City Health and Social Care Partnership (GCHSCP) stands as the largest partnership for health and social care in Scotland, both in terms of population served and budget managed. GCHSCP covers three distinct localities: North East, North West and South. This Locality Plan provides a detailed overview of the main programmes within each area, all of which are aligned with the strategic actions set out in the Integration Joint Board (IJB) Strategic Plan 2023-28. These strategic actions are categorised under the IJB's core priorities illustrated in the below.

The Strategic Plan underlines the GCHSCP's ongoing commitment to collaborative working with community partners. The partnership's primary aims are to improve health and wellbeing, prevent illness, reduce social isolation, combat both poverty and financial insecurity, and tackle persistent health inequalities across Glasgow city.

For the first time, all locality plans have been brought together into a single, consolidated document. This integrated approach, covering the period from April 2026 to March 2028, is designed to make information more accessible and user-friendly, and to ensure consistency with the current IJB Strategic Plan.

Purpose of the consolidated plan

By presenting the locality information together, this plan aims to better support community partners by:

- Enhancing understanding of citywide priorities and community needs.
- Enabling partners to align their activities more closely with GCHSCP's objectives.
- Encouraging new opportunities for collaboration across organisations.

The adoption of this new format is intended to foster meaningful engagement with HSCP priorities and to strengthen collaborative efforts throughout the city.

Addressing Health Inequalities

GCHSCP is dedicated to reducing health inequalities by removing barriers and adapting services to better meet the diverse needs of its residents.

The partnership works closely with community partners to deliver NHS Greater [Glasgow and Clyde's Public Health Strategy](#), *Working Together to Stem the Tide*, which sets out nine key public health priorities. Since 1999, the Adult Health and Wellbeing Survey has been conducted every three years to monitor local health trends.

Maximising Independence

Maximising Independence remains a central goal for GCHSCP, driving the creation of asset-based and strengths-focused programmes across the city. This initiative seeks to collaborate with service users and local communities to develop sustainable, locally led projects that foster inclusion, wellbeing, and independence, thereby reducing reliance on statutory services. One such example is the Make it Local programme, which works in partnership with organisations to deliver local services and activities.

Supporting Carers and Young Carers

Carers are vital to Glasgow's communities, providing essential support to individuals with a wide range of needs, including family members, friends, and neighbours. The Carers (Scotland) Act 2016, which took effect on 1 April 2018, introduced additional responsibilities for Integration Joint Boards regarding support for carers.

GCHSCP Carers Strategy can be found at [Glasgow City HSCP Carers Strategy 2025-2028](#).

The HSCP are dedicated to supporting young carers, meeting our responsibilities under GIRFEC, the Promise, and the UNCRC to protect their rights and wellbeing. The upcoming [Children's Services Plan \(CSP\) 2026–2029](#) will reinforce our commitment to helping young people, especially young carers, through clear strategies and partnership work.

Recognising the crucial contributions of carers, the Glasgow Carers service was established in November 2024 to enhance support provision. Working in close partnership with GCHSCP, Glasgow Carers has introduced several feedback mechanisms to capture carers' experiences of health and social care services. These include peer support groups, an accessible survey, dedicated telephone support, and in-person assistance across the city. Carers' voices are integral to decision-making, with representation on key committees such as the Glasgow City

Integration Joint Board, IJB Public Engagement Committee, and Locality Engagement Forums.

Glasgow Carers' Feedback — What We Heard

Access to Support

Carers face ongoing challenges in getting the support they need.

Eligibility Changes

Recent assessment updates have caused confusion and uncertainty.

Respite Flexibility

Carers want more adaptable respite options that fit real-life situations.

Wellbeing & Emotional Support

Carers need better access to counselling and peer-support opportunities.

Value of Carers Centres

Carers appreciate the practical and emotional support provided.

Primary Care

[Glasgow's Primary Care Action Plan \(PCAP\) - 2023-26](#) approved in September 2023, builds on earlier plans to help GPs focus on complex cases by expanding the wider primary care team. The PCAP also covers managing the prescribing budget, working with primary contractors (GPs, optometrists, dentists, and pharmacists), and supporting primary care sustainability in Glasgow.

[NHS GGC's first Primary Care Strategy](#), approved in May 2024 and running to 2029, aligns with NHSGGC's Delivery Plan and GCHSCP's PCAP. It aims to improve health and wellbeing by focusing on digital care, workforce optimisation, and integrated pathways, in collaboration with NHSGGC and other HSCPs.

Performance Indicators

GCHSCP evaluates performance by using Key Performance Indicators (KPIs) across all services. These metrics are regularly reviewed and reported through

[Quarterly](#) and [Annual Reports](#) to the Integrated Joint Board and its Finance and Scrutiny Committee. The Annual Report features both local area data and citywide KPIs, highlighting the contributions and outcomes achieved within each locality.

Equalities and Legal Responsibilities

The Integration Joint Board (IJB) is legally bound by the [Equality Act 2010](#), requiring it to prevent discrimination and promote equality for individuals with [protected characteristics](#).

Statutory Duties

To meet its legal responsibilities under the Equality Act 2010, the IJB is required to undertake the following actions:

- Publish its own set of equality outcomes.
- Report on progress towards the achievement of these equality outcomes.
- Report on the mainstreaming of the equality duty within its activities.
- Conduct, review, and report on Equality Impact Assessments for relevant policies and programmes.

Further Information

Find the IJB's 2024-2028 equality outcomes in [The GCHSCP Equality Outcomes 2024-2028](#). Ongoing activity details are at [Equality activity](#).

Locality Overview

North East Locality

The North East Locality oversees a comprehensive range of services for its 173,876 population. Leadership is provided by the Assistant Chief Officer, who is responsible for both strategic direction and operational delivery of Children's Services within Glasgow City Health and Social Care Partnership. Key services managed in this locality include Health Visiting, the Family Nurse Partnership, School Nursing, Children and Families Social Work, and a variety of family support services that are delivered in partnership with the third sector. It is composed of seven Area Partnerships.

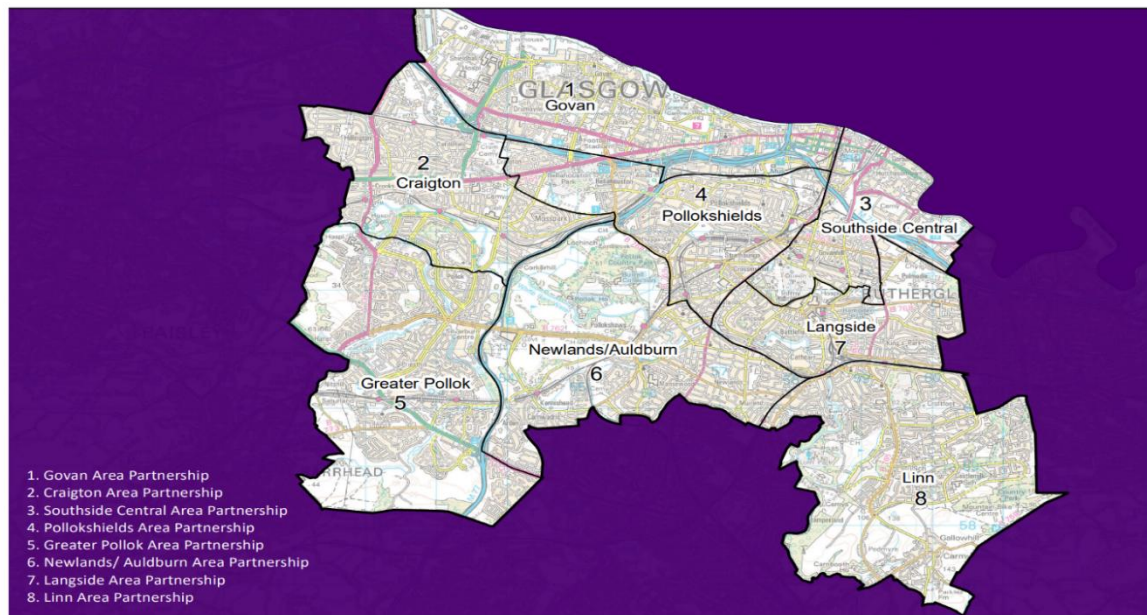

North West Locality

The North West Locality is responsible for delivering a broad spectrum of services to its community. The Assistant Chief Officer in this area leads Adult Services for GCHSCP, ensuring that care and support are effective and responsive to the needs of adults living in the locality. The North West Locality has a total population of 222,284 and comprises eight Area Partnerships:

South Locality

The South Locality is led by an Assistant Chief Officer who provides strategic and operational oversight for the Older People's Services within GCHSCP. This role involves coordinating the delivery of essential supports tailored to older adults residing within the locality. South Locality serves a population of 227,890 and covers eight Area Partnerships:

Health & Wellbeing Data Overview

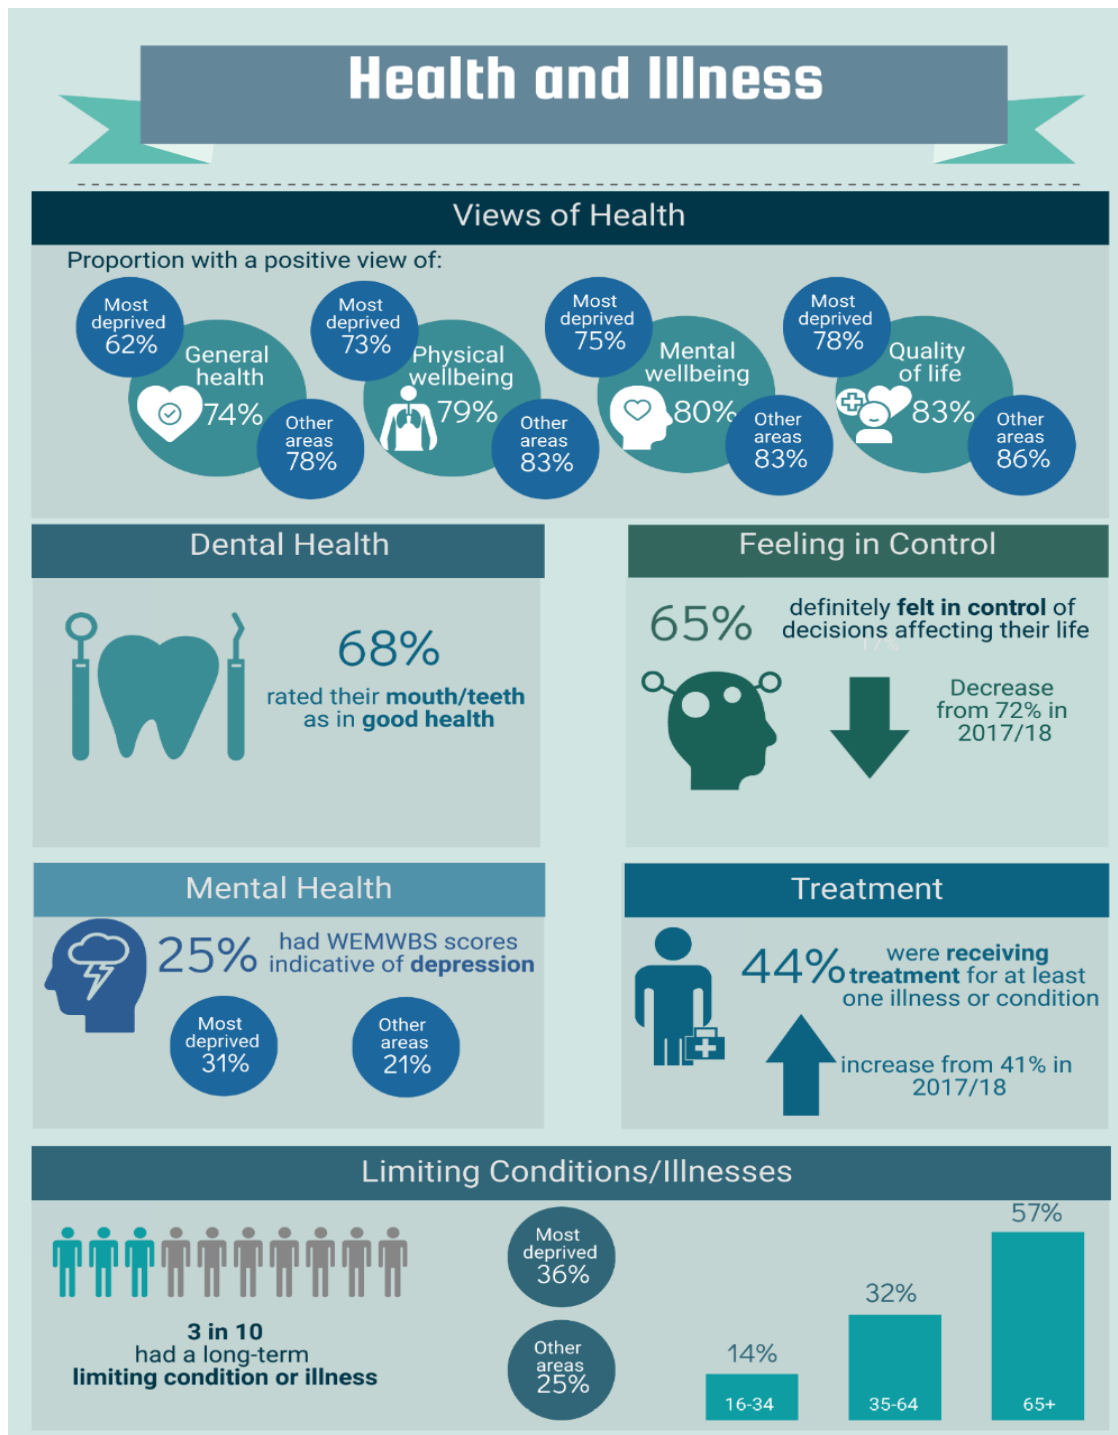

This section offers an overview of key data and trends relating to the North East, North West, and South Localities. The information is based on demographic profiles and findings from the 2022/23 adult health and wellbeing survey, the most recent survey undertaken. These insights serve as a vital resource for understanding the current health and wellbeing landscape within each locality, highlighting significant developments and ongoing challenges.

Locality Reports and Further Analysis

For readers who require more detailed information and a deeper analysis, comprehensive locality reports are available. These reports provide extensive context and an in-depth examination of health and wellbeing indicators for each area. The full reports can be accessed as follows:

- NHS Greater Glasgow and Clyde 2022/23 adult health and wellbeing survey: North East locality report (<https://www.stor.scot.nhs.uk/handle/11289/580385>)
- NHS Greater Glasgow and Clyde 2022/25 adult health and wellbeing survey: North West locality report(<https://www.stor.scot.nhs.uk/handle/11289/580385>)
- NHS Greater Glasgow and Clyde 2022/25 adult health and wellbeing survey: South locality report (<https://www.stor.scot.nhs.uk/handle/11289/580379>)

People's Perception of their Health & Illness

[2022-23 HWB Survey Glasgow City - Final Report 2.pdf](#)

Locality Progress & Priority Actions

Progress and Priority Actions 2026-28

Appendix 1 provides a comprehensive account of locality achievements and future priorities across various care groups for the period 2026-2028. Key areas include strengthened support for carers and children, enhancements to older people and mental health services, homelessness prevention strategies, and developments within justice services, amongst others. The overall localities focus remains on supporting the implementation of priorities set out in the IJB Strategic Plan and achieving improved care outcomes for the residents of Glasgow city.

Showcasing Local Service Impact

Each locality showcased a key service, demonstrating its importance and benefits to the community. These examples highlight the value of collaboration and tailored support across Glasgow.

North East Locality: Parkhead Hub

Celebrating the First Year of Parkhead Hub (awaiting consents for photos)

In 2026, Parkhead Hub - a celebrated health, social care, and community facility in the North East locality - marks its first year of operation. Officially opened by the First Minister, John Swinney, on 8 December 2025, the Hub was recognised as a model of collaborative and innovative partnership working, bringing together health, social care, communities, and third sector organisations. Throughout its inaugural year, the Hub has been instrumental in the co-creation and delivery of a comprehensive programme of services and community activities, guided by the *Community Network Approach*.

Community Network Approach and Programme

The Community Network Approach centres on understanding and meeting the diverse needs of key stakeholder groups, including local residents, service users, and carers. During its first year, the Hub introduced a range of initiatives to support this goal:

- **Network Task Group:** This group is responsible for planning and delivering a wide array of events within the Hub, creating opportunities for services, third sector agencies, and local groups to connect, share knowledge, and exchange skills and information.
- **Community Pop-Ups:** These events raise awareness of local supports and public health campaigns, featuring organisations such as Women's Aid, Money Advice, Helpful Hints with Home Technology, Hearing and Hearing Aid

OFFICIAL

Support, Rosemount Learning, Pain Management, and Alzheimer's Scotland, amongst many others.

- **Community Room Booking Facilities:** The Hub regularly hosts room bookings for around twenty organisations, including Lifelink, SAMH, Moira Anderson Foundation, Alcohol Awareness, and Skills Development Scotland, facilitating a wide range of community support activities.
- **Local Engagement Forum:** Quarterly meetings bring together key speakers and members to discuss topics of interest - such as support for carers and recovery - strengthening local engagement and dialogue.

Inclusive Outreach and Engagement: Hub & Spokes

The Community Network Approach is working on extending beyond the Hub itself, encompassing outreach activities across the North East locality. Community engagement efforts reach a variety of venues, including shopping centres, youth clubs, health centres, and housing associations. This inclusive Hub and Spoke model is designed to enable the local community to shape the ongoing development of activities and services.

Participation and Impact

Between April and December 2025, approx. 25 different groups engaged with the Hub each month, resulting in 1,000 sessions and involving nearly 7,000 participants. Parkhead Hub has quickly become a vibrant gathering place for organisations, offering opportunities for one-to-one sessions, group activities, and large-scale community events. The first Community Network Day, held in May 2025, featured over 50 stalls from health, social care, and third sector organisations, attracting more than 350 community members and staff. The theme was Mental Health and Wellbeing of children, young people and their families directly responding to suggestions from service users and the wider community.

“Really well organized with lots of different and interesting people doing amazing things, it was lovely to connect and chat to everyone”

Ongoing Community Feedback and Communication

Parkhead Hub has established itself as a platform for continual community feedback on services. It has also introduced a weekly 'What's on at Parkhead Hub' schedule, providing local residents with up-to-date information on available services, supports, and activities.

Play Café Case Study: Parkhead Hub

The Play Café is a weekly group for families running at the Parkhead Hub. It is delivered in partnership with Platform Easterhouse and funded through Whole Family Wellbeing Fund. Led by artist Rebecca Fraser and a creative team, families learn new skills and participate in activities that they can continue at home with their children. It takes a nurturing approach, providing lunch to help adults and children to feel welcome, bond and make new friends. An average of 30 attend each week with

OFFICIAL

7 languages spoken. A volunteer support assistant helps set up Play Café. Partnership working is also an important part with services sharing their skills, knowledge and offering supports including Parkhead CAB, GAMH NE Carers and Health Improvement. Celebration events take place including children's birthdays and cultural holidays.

I had a hard pregnancy so now I'm trying to enjoy every minute of him" //
"Look! She's laughing! And now we're all laughing... it's infectious!" // **"This is his first time eating melon!" //** **"She's really come out of her shell here" //** **"The food is beautiful- thank you"**

North West Locality (Adult Services): The Thistle Safer Drug Consumption Facility

The Glasgow City Health and Social Care Partnership (HSCP), working collaboratively with key stakeholders, has established the Safer Drug Consumption Facility (SDCF) in Scotland—marking a significant milestone as the first service of its kind in the United Kingdom. This initiative reflects an innovative and progressive approach to drug harm reduction within the city.

[The Thistle Safer Drug Consumption Facility](#) provides a supervised and supportive healthcare setting where individuals are able to inject drugs, which they have obtained elsewhere, in a clean and hygienic environment. The facility operates under the supervision of trained health and social care professionals, who prioritise the safety and wellbeing of all service users. Through the provision of professional support, the facility aims to offer a dignified and non-judgemental service to those who require it.

Reducing Community Impact

A central goal of the Thistle facility is to minimise the negative effects that outdoor drug injecting can have on the local community. By offering a safe and controlled environment for drug consumption, the facility seeks to reduce disruptions and concerns faced by nearby residents, businesses, and the wider neighbourhood. This

approach is instrumental in fostering a safer, cleaner, and more cohesive community environment.

Pathways to Support and Improved Wellbeing

The immediate access to expert assistance within the facility encourages individuals to seek further support and guidance. This proactive approach creates opportunities for service users to improve their health and overall quality of life. By supporting both individual recovery and broader community wellbeing, the facility contributes to a healthier and more resilient society.

Glasgow City ADP: Lived and Living Experience (LLE) Reference Groups

Lived and Living Experience Reference Groups Structure

The Glasgow City Alcohol and Drug Partnership (ADP) has established Lived and Living Experience (LLE) Reference Groups, including Mixed, Women's, and Families groups. Unlike traditional service user groups, these are led by members committed to improving outcomes for those affected by alcohol and drug harm across the city, representing diverse recovery journeys.

With member-led agendas and facilitation by the ADP Support team, these groups maintain strong links to senior management and strategic teams. The model is recognised by the HSCP for promoting trust, transparency, and accountability in ADP's work.

Active Participation and Impact

LLE Reference Groups dedicate time to understanding Glasgow's care system, engaging senior leadership with questions and suggestions to improve services. They've contributed to multiple HSCP initiatives, including co-producing the Thistle Service, assisting in staff recruitment, and influencing facility design. Outside the Thistle Service, these groups have facilitated commissioning events for alcohol and drug services citywide, helped develop the Greater Glasgow and Clyde Stigma Framework, and participated in Trauma walkthroughs for Glasgow Alcohol

and Drug Recovery Services. They set their own priorities, targeting harm reduction and recovery for those affected by alcohol and drugs in Glasgow.

South Locality: Make it Local Programme

The Third Sector continues to play a pivotal role in shaping health and social care within Glasgow's localities. Deeply embedded within neighbourhoods and communities, Third Sector organisations support the delivery of GCHSCP's strategic and operational priorities. The organisations are widely recognised for their ability to offer meaningful, hyperlocal support which strengthens wellbeing, improves health outcomes, and maximises independence.

Programme Overview and Partnerships

The *Make it Local* project forms a crucial element of [GCHSCP's Maximising Independence Programme](#) and reflects a strong commitment to community partnership. The *Make it Local* approach is preventative and community-led; ensuring that support is tailored to local needs and delivered in a way that empowers individuals. The focus on early intervention and maintaining independence is closely aligned with the objectives outlined within the Locality Plan, highlighting the role of collaborative, community-based action in achieving better outcomes for all.

Working closely with eleven diverse community organisations across Glasgow demonstrates the breadth of its reach and collaboration. Within the North West Locality, groups such as Weekday Wow Factor (WOW), Kingsway Community Connections, and Linkes are active partners in the initiative. Research is currently ongoing to understand and evaluate the effects of community-based activities delivered through these partnerships, focusing on how such interventions can improve the health and wellbeing of local residents.

Championing Community Voices

Robert Smith, a former Chair and longstanding member of the North West Locality Engagement Forum, has consistently championed community voice and participation. Through collaborative work with GCHSCP colleagues, he has amplified the influence of the community and increased the visibility of the Third Sector. As he approaches retirement from WOW, his enduring commitment and positive impact on health and social care in Glasgow are recognised and celebrated.

Strengthening Local Engagement in Health and Social Care

Role of Locality Engagement Forums

Within each area of Glasgow, [Locality Engagement Forums](#) serve as an essential bridge between local communities and the governance and planning structures of the GCHSCP. LEFs are instrumental in raising awareness of the Integration Joint Board, consulting on Locality Plans, and encouraging active participation from both service users and organisations. By fostering meaningful engagement, these forums help to ensure health and social care services are responsive to the distinct needs of each community.

Broadening Stakeholder Engagement across Localities

To maintain high-quality and sustainable services, GCHSCP is dedicated to meaningful stakeholder engagement. This commitment is central to the decision-making process and guarantees that any changes to services reflect the views and requirements of local people, as well as the unique characteristics of their communities.

Consultation and Inclusive Participation

Localities are committed to broadening and enhancing their engagement initiatives with the objective of reaching a diverse audience throughout the duration of the Locality Plan. A variety of accessible online platforms will be utilised for conducting surveys, facilitating consultations, providing updates on proposed service modifications, and promoting public meetings. These inclusive approaches are

designed to involve a wide spectrum of community members, ensuring that all stakeholders remain engaged and informed about key GCHSCP developments.

Collaborative Development and Co-Production of Services

In addition to digital engagement, GCHSCP is committed to partnership working, sharing responsibility for decision-making, co-producing and co-designing service changes with staff, LEF members, and stakeholder representatives. The facilitated sessions are organised to bring people together, allowing participants to share ideas, identify key priorities, and collaboratively develop solutions. GCHSCP staff also engage directly with the public in health and social care settings and at community venues to create more opportunities for direct interaction and keeping people informed. During consultation periods, public meetings are held in accessible venues to provide deeper insight into the varied needs arising from different socio-economic and environmental backgrounds within Glasgow city.

Ways to Get Involved

People living and working within Glasgow's localities are invited to contribute to feedback and to [help shape the future of health and social care services](#). Opportunities for involvement include joining the Locality Engagement Forum, connecting with GCHSCP staff to discuss priorities and service changes, and completing surveys and questionnaires online or at local health and social care centres. Feedback can also be shared directly with GCHSCP staff in person, by telephone, or via email, ensuring everyone has an equal opportunity to participate and to be heard.

Appendix 1**Progress & Priority Actions 2026-28**

Lead Locality	Service Area	Key achievements 2024-2025	Specific actions for 2026 - 2028
North East	Children and young people mental health well-being services	<p>The 10 recommendations from People Achieving Change Mental Health Research are available. Mental health support is offered in various formats - digital, face-to-face, group, and one-to-one - focusing on marginalised groups.</p> <ul style="list-style-type: none"> • Digital help for secondary pupils on anxiety, school, and relationships • Workshops like Art for Wellbeing and Walk & Talks • Outreach to Roma, Refugee, and Asylum-Seeking families • Community counselling for 12–19-year-olds • Compassionate Distress Response Service • Parent peer support on self-harm, suicide prevention, neurodiversity • LGBT+ specialist provision • Support for families with children awaiting Autism assessment 	<p>The Children's Services Plan 26-29, including the first Children's Rights Report 26-29, is being developed with input from Glasgow partners and direct engagement with children, young people, and families. Methods so far have included discussions and creative arts, with a focus on supporting health and wellbeing for all children.</p>

		<p>Tier 1 and 2 services address non-clinical needs. For example, the Youth Health Service provides (clinical and non-clinical) support via evening clinics and online services for young people aged 12-19 (and up to 26 for vulnerable and care experience young people) at nine Glasgow venues. The Networking Team helps families and professionals with Autism assessment and enhances post-diagnosis support.</p>	
North East	Domestic Abuse Strategy	<p>Domestic Abuse Children & Families Operational Group – Key Achievements: Safe & Together Training rolled out in South Locality, encouraging new, victim-supportive practices.</p> <p>Nuffield Research in Glasgow: improving evidence-based responses for families affected by domestic abuse.</p> <p>Created a Children’s Tool Bag to enable staff to have trauma-informed conversations with children.</p> <p>Family Group Decision Making introduced to involve the whole family in support planning.</p> <p>Mapped local services supporting those</p>	<p>Continue to implement the recommendations set out in our Domestic Abuse Strategy, 2023-28. This includes agreement to develop a suite of Domestic Abuse training aligned to strength-based, trauma-informed principles for roll out. The development will draw upon the audit findings from Safe & Together training and expertise of our staff involved in Children and Families. It will seek to strengthen and enhance our existing practice helping ensure our frontline staff are equipped with the most up-to-date knowledge, skills and tools to support those affected by domestic abuse.</p>

North East	Trauma-Informed Practice	We partner with families, acknowledging trauma and valuing their input. Support is accessible through universal services for early intervention. Trauma-informed staff training is piloted in Addictions, Criminal Justice, Homelessness, and Mental Health in North East Glasgow. The Glasgow Intensive Family Support Service (GIFSS) aids families with young people at risk, working with HSCP and partner organisations, focusing on strengths and listening to all family members.	Progress with the priority areas identified from the Trauma Informed Practice self-assessment, including ongoing workforce development and training around Trauma Informed Practice with support from the Trauma Informed Practice Training and Implementation team.
North West	Alcohol and Drug Services	Glasgow City Alcohol & Drug Recovery Services (ADRS) consistently improved implementation of national MAT Standards (Medication Assisted Treatment standards), raising care quality each year. The Central Shared Care Team, launched in November, co-ordinates Opioid Substitution Therapy (OST) in primary care. Alongside the Primary Care Facilitation Team, they support 72 GP practices and around 750 patients. This centralised model aims to boost consistency, clinical governance, and capacity across ADRS.	<p>A National Alcohol & Drug Strategy will be published in 2026, with a local plan to follow. Ongoing priorities include applying Medication Assisted Treatment (MAT) standards for high-quality drug treatment, expanding the Shared Care model with more GPs. Collaboration between Shared Care, Primary Care Facilitation, and ADRS teams will ensure seamless care. Continued support for GP practices, capacity monitoring, and evolving operational guidance are also planned.</p> <p>Create a business plan for a smoking/inhalation area at the Thistle site to help maximise SDCF (Safer Drug</p>

		<p>Launched in 2025, The Thistle Safer Drug Consumption Facility has exceeded expectations, receiving positive feedback from users and stakeholders. The program currently has 575 registered users and has recorded 7,827 injecting episodes. It has facilitated 612 support service referrals, with most referrals directed toward housing, recovery services, and blood virus support. There are 25 active forum participants, and staff have delivered a total of 13,368 interventions. Additionally, 93 medical emergencies have occurred, with staff successfully managing 78 of these on-site.</p>	<p>Consumption Facility) benefits. Partner engagement has begun.</p>
North West	Community Mental Health Supports	<p>Community engagement revealed that community mental health services should address local needs and help reduce hospital admissions.</p>	<p>Create a plan to implement the 5-year Mental Health Services strategy for NHSGGC. Further engagement to assess possible locations for preferred mental health in-patient hospital sites.</p>
North West	Domestic Abuse	<p>Significant investment has gone into staff training on domestic abuse, risk assessment, and resilience in the justice sector. Safe Lives training was delivered to various service areas, including community justice and health care in police custody</p>	<p>Continue implementing the 2023-28 Domestic Abuse Strategy and enhance outcomes for service users and communities impacted by domestic abuse, while also improving staff knowledge and skills, several key priorities have been identified. These include creating a training plan for all HSCP staff, building a data dashboard to monitor the strategy's progress, and</p>

		<p>and prisons. In 2024, 392 staff from adult and older people's services attended awareness briefings.</p> <p>A Children's Tool Bag was also created to help staff discuss domestic abuse with children.</p>	<p>establishing a Domestic Abuse Resource Repository that is accessible to everyone within HSCP.</p>
North West	Homelessness Prevention	<p>WAYfinder, launched in August 2025, has overhauled Glasgow's homelessness support system. It is shaped directly by people with lived experience. Prevention has improved significantly: more than half of all households seeking assistance had their homelessness prevented. A new online housing options explorer was introduced to give a tailored advice and guidance. In 2024/25, more than 3,600 homeless households were helped into permanent accommodation.</p>	<p>Finalise the ten-year Temporary Accommodation Strategy to end routine use of bed and breakfast accommodation and reduce time spent in temporary accommodation.</p> <p>Launch Phase 2 of the housing options explorer for bespoke advice and assistance.</p>
North West	Justice Social Work and Community Justice	<p>Your Voice gathers feedback on communication, unpaid work, and office environments to improve services and support rehabilitation.</p> <p>Community Payback Orders combine unpaid work with interventions like drug or mental health treatment. Justice Social Work teams provide placements that</p>	<p>Improve Structured Deferred Sentences, Bail Supervision, and Diversion programmes, to lower remand rates and shift care to communities.</p> <p>Embed trauma-informed approaches in all justice interventions to better support rehabilitation and independence.</p>

		those positive, offered immediate treatment. An Implementation Steering Group was established to oversee MAT (Medication Assisted Treatment) Standards in prisons.	Develop planning and governance structures with the Scottish Prison Service for the transition from HMP Barlinnie to HMP Glasgow (opening 2028/9).
North West	Services for Adults with Learning Disabilities	Reduction in the number of people experiencing delays when transitioning from hospital in-patient to a community setting.	Enhance the environment within existing day services buildings. Develop a business case to explore the potential for a new, purpose-built facility aimed at replacing the current HSCP day service facilities
North West	Sexual Health	The Service Review has been fully implemented, with the revised service configuration in place from September 2025. Access to Urgent Care and Termination of Pregnancy services remains on target, and engagement with Integrated Children's Service planning groups has supported the inclusion of children and young people's sexual health and wellbeing needs in local plans.	Develop a Greater Glasgow & Clyde-wide common service model for abortion services and post-abortion contraception, maximize STI/BBV (sexually transmitted infections / blood borne virus testing capacity, and establish a multi-disciplinary working group for improved access to longer-acting reversible contraception and post-partum/abortion contraception.
North West	Supporting Engagement	Within the North West Locality, multiple approaches are applied to advance engagement in health and social care. Individuals accessing services provide direct feedback to staff, while	Following the January 2026 LEF development session, key priorities were set for the year:
