# 1. Purpose

- 1.1. The purpose of this report is to update the IJB Finance, Audit and Scrutiny Committee on the IJB Risk Register and to highlight key operational risks being managed in the Glasgow City Health and Social Care Partnership.
- 1.2. This report covers the review carried out in March 2025 in respect of changes to risks in Quarter 4 (Q4) which covers the period 1 January 2025 to 31 March 2025.

# 2. Integration Joint Board Risk Register

- 2.1. The Integration Joint Board Risk Register is maintained and reported in line with the Glasgow City IJB Risk Management Policy.
- 2.2. The IJB Risk Register contains strategic risks that represent the potential for the IJB to achieve or fail to meet its desired outcomes and objectives as set out within the Strategic Plan, and typically these risks require strategic leadership in the development of activities and application of controls to manage the risk.
- 2.3. At its 11 December 2024 meeting, members of this Committee requested that the description of the risk relating to the Thistle (*Ref: 2535*) be rearticulated in order to be clearer that this is a reputational risk to the IJB, and the potential causes of negative attention that may realise this risk. This has been updated and is included in Appendix 1.
- 2.4. There were 2 new risks added to the register during Q4:
  - Ref 2591: Impact of employer National Insurance increase on HSCP Services. Risk owner noted there is a risk that Health funding for increased employer National Insurance contributions is less than the 100% assumed from Scottish Government. Risk has been added with a risk level of 'High'
  - Ref 2592: Impact of employer National Insurance increase on Commissioned Services. Risk owner noted that there is a risk that Providers pass on cost of increased NI contributions to the HSCP. Risk has been added with a risk level of 'Very High'.
- 2.5. There was 1 risk closed on the register during Q4:
  - Ref 2037: Impact of National Care Service on recruitment & retention.
    The risk owner has asked to close this risk due to the removal of
    provisions to establish a National Care Service from the National Care
    Service (Scotland) Bill.
- 2.6. There were no existing risk scores that increased on the register during Q4.
- 2.7. There were no existing risk scores that decreased on the register during Q4.

2.8. At the conclusion of the March 2025 review there were **15** live risks on the register, with **9** risks having a current risk level of 'Very High', **3** risks with a risk level of 'High' and **3** risks with a risk level of 'Medium'.

- 2.9. All risks on the IJB Risk Register at the end of Q4 are shown in Appendix A.
- 2.10. The next quarterly review of the IJB Risk Register is scheduled to be carried out in June 2025.

# 3. Key Operational Risks (Q4)

- 3.1. The HSCP's Health and Social Care Risk Registers are maintained and reported in line with the risk management policies and guidance of the partner bodies NHS Greater Glasgow & Clyde and Glasgow City Council.
- 3.2. The Health and Social Care Risk Registers contain operational risks that can be escalated to the Health Board or the Council's corporate risk registers if necessary. Where an operational risk has the potential to become a strategic risk to the IJB it can also be escalated to the IJB Risk Register.
- 3.3. The risk relating to negative media/publicity was assessed to have increased during Q4 (from Unlikely to Possible) due to ongoing issues relating to the timescales for responding to Subject Access Requests, and potential reaction to the IJB budget for 2025/26 which was agreed at the IJB meeting on 19 March 2025.
- 3.4. Staff shortages continue to be the predominant potential cause of risks on the Health risk register. In Q4 a new 'very high' risk was added in relation to the scheme of delegation of the clinical governance framework for Psychological Therapies with the cause noted as temporary psychology leadership cover ending and the relevant posts have not been approved for recruitment.
- 3.5. At the end of Q4 there were **36** 'live' risks on the Social Care register, with **13** risks having a current risk level of 'Very High', **16** risks with a risk level of 'High' and **7** with a risk level of 'Medium'.
- 3.6. At the end of Q4 there were **57** 'live' risks on the Health register, with **23** risks having a current risk level of 'Very High, **16** risks with a risk level of High, and **18** with a risk level of Moderate.

3.7. The next quarterly review of the Health and Social Care Risk Registers is scheduled to be carried out in June 2025.

#### 4. Recommendations

- 4.1. The IJB Finance, Audit and Scrutiny Committee is asked to:
  - a) Note the contents of this report;
  - b) Note the amended description of Risk ref 2535; and
  - c) Note the risks on the IJB Risk Register at the end of Quarter 4 2024-25

2241	Impact of expenditure of prescribing	RISK. The significant cost pressure on our Prescribing Budget 24-25 is driven by a sustained prescribing budget 24-25 is driven by a sustained prescribing volume growth combined with an increase in the global price of drugs. CAUSE: The on-going increase in costs of drugs due to a range of global factors and the ongoing increase and volatility in costs due to a range of Global Factors and increase in volume of prescribing. EFFECT. Additional pressures on the cost of prescribed medicines are expected because of higher energy & transport costs, wage inflation and for imported medicines for expected because driven from the EU. There will likely be increase in demand.
