## **FOREWORD**

This is the third Locality Plan for the South since the establishment of the Health and Social Care Partnership (HSCP) in 2016. The aim of the plan is to provide a review of the progress made in 2017/18 and to identify our priorities for 2018/19.

There are challenging times ahead both in financial terms and also in delivering improvements in our performance. As well as progressing on-going work, within the plan you will see ambitious and exciting new projects which we plan to implement in the year ahead which will improve lives and to further reduce inequalities. These include:

- completion of the £17m New Gorbals Health & Care Centre replacing the old health centre, South Bank Centre and the Two Max building. The development as well as improving services is a major contribution to the on-going regeneration of the Gorbals area;
- introducing new integrated neighbourhood teams to better support older people in the community and work more closely with GPs, third sector partners and others;
- continue to support the implementation of the Thriving Places agenda with community planning partners and local communities in Gorbals, Govan, Priesthill/Househillwood and Govanhill to improve health and well-being;
- implementing a “test of change” approach to community support where all services pull together and attend “Early Help” meetings with a solution focused approach to helping families;
- developing a community immunisation model across the South to improve childhood immunisation rates;
- implementing new alcohol and drug access team arrangements in line with the realignment of team locations across the South; and,
- review links between Primary Care Mental Health Teams, Community Mental Health Teams and GP practices to identify a link with each cluster.

This plan for 2018/19 highlights the challenges we face in the South in taking forward this agenda, the key issues for users and carers, and the actions we are going to take over the course of the year to implement the HSCP’s Strategic Plan and respond to local needs. We are keen to build on the first year of our status as an integrated organisation, working closely with our partners, local communities and organisations.

# 1. INTRODUCTION

## Health & Social Care Partnership Strategic Plan 2016-19

Glasgow City Integration Joint Board (IJB) came into being in February 2016 and in March that year the Board endorsed a three year Strategic Plan for the period up to 2019 (see <https://www.glasgow.gov.uk/index.aspx?articleid=19044>). In that Plan the IJB set out its vision for health and social care services - that the City's people can flourish, with access to health and social care support when they need it. The IJB envisaged that this would be achieved by transforming health and social care services for better lives. This Locality Plan shows how we intend to implement that plan in the South of the City. The figure below shows the three localities in Glasgow, and the areas covered.

## **2. OUR KEY PRIORITIES**

The biggest priority for the Health & Social Care Partnership (HSCP) is delivering transformational change in the way health and social care services are planned, delivered and accessed in the city. We believe that more of the same is not the answer to the challenges facing Glasgow and will strive to deliver on our key priorities as outlined below:

- early intervention, prevention and harm reduction;
- providing greater self-determination and choice;
- shifting the balance of care;
- enabling independent living for longer; and,
- public protection

In the HSCP localities are an important part of our integration arrangements to improve the delivery of health and social care services for the people of Glasgow. We have agreed three localities in Glasgow as shown above. A key responsibility of localities is to produce a locality plan for the area they serve. This document is the locality plan for South Glasgow for 2017/18. In last year's plan we gave a profile of the locality and the services we provide. Similar plans are also available for the North East and the North West.

The purpose of this plan is to:

- show how we will implement the HSCP's Strategic Plan 2016-2019 in the South of the city, and what this will mean for service users, patients and local communities; and
- how we will respond to local needs and issues.

The plan is a one year plan covering the period April 2018 to March 2019. The plan is based on:

- what we know about health and social care needs and demands and any changes from the 2017/18 plan;
- our current performance against key targets;
- the key service priorities as defined in the HSCP's Strategic Plan, including health improvement and what we are doing to tackle inequalities; and,
- the resources we have available including staff and accommodation.

We will report later in the year on how we are doing in implementing the plan and identify further areas of improvement for next year's plan. If you have any comments on this plan, let us know.

### **3. COMMUNITY ENGAGEMENT – LOCALITY ENGAGEMENT FORUM**

Glasgow City Health and Social Care Partnership has a Participation and Engagement Strategy that sets out the principles and approach to engaging individuals, groups and communities in service planning and development for community health and social care services. Each locality has its' own arrangements to meet this commitment. South locality launched its' Locality Engagement Model in April 2017 at an event attended by 60 local groups, organisations and community representatives. The model consists of three key strands:

1. A Locality Engagement Network of individuals, community representatives, groups and organisations with an interest in local health and care services. The Network has produced three Locality Engagement Bulletins sharing news and information about health and social care services in the South and wider HSCP. The bulletin also highlights services provided by local groups and projects. It is circulated to 350 Network members in South Locality and is also available on the HSCP website.
2. A programme of feedback and engagement activities that enable people using HSCP services to share their experience at the point of access. This includes support for citywide consultation and engagement opportunities. Support is provided to frontline staff to enable them to develop feedback opportunities, consultations and user involvement activities.
3. A series of Locality Engagement Forum meetings bringing together users, carers and community organisations with experience of particular care groups or HSCP services. The forums have helped plan and deliver four public engagement sessions and over 180 people participated in one or more of these session in 2017/2018. Participants gave feedback on a range of health and social care issues including;
  - Treatment Room services
  - Occupational Therapy Services
  - Palliative and end of life care
  - Access to interpreting and translation services
  - Pathways into health and social care
  - Community views on the new Gorbals Health and Social Care Centre
  - Support services for older people in the community
  - A new neighbourhood model for Older People's Services
  - Creation of a Suicide Safer Community in South Glasgow
  - A new model for adult mental health services in Glasgow

Key messages from these sessions included;

- An understanding amongst the wider public of why we need to review how we deliver services and make them fit for the future
- HSCP must communicate better and at the earliest opportunity with patients, users, carers and third sector partners
- HSCP should work more closely with community planning partners to ensure better communication and joined up decision making
- Person centred care needs to remain at the heart of all decision making in spite of the financial and other challenges facing public services

The HSCP is committed to listening to a wide range of user, carer and public views and feedback, comments, concerns, ideas and suggestions are used to inform future service planning and delivery. Key locality engagement priorities for 2018 include:

- Continue to grow the Locality Engagement Network
- Deliver a further three public engagement sessions in partnership with members of the Locality Engagement Forums
- Create opportunities for people to share their views on key HSCP plans and priorities including:
  - review of Out of Hours services
  - primary Care Improvement Plan
  - Moving Forward Together Programme
  - HSCP Strategic Plan, and,
  - HSCP Locality Plan

## 7. PROMOTING EQUALITY

The South Locality will contribute to the delivery and actions and priorities set out within Glasgow City HSCP's Equality Plan 2016-18. Key actions and priorities for the South include:

- roll out of 'Checking It Out' Toolkit across services;

- staff awareness raising sessions to improve uptake and referrals to interpreting services and use of accessible information for patients;
- maintaining accessibility audits and Equality Impact Assessments for new buildings;
- participation in Equality Impact Assessments of cost savings, service redesigns, service developments and policies;
- hate crime awareness and reporting;
- routine enquiry money worries, gender based violence (GBV), employability and appropriate onward referral;
- responding to findings of the Fairer NHS staff survey alongside staff training priorities (Asylum seekers & Refugees, Poverty e-learning module, key care groups including Roma and GBV);
- meeting the requirements of the HSCP's participation and engagement strategy including equalities monitoring of community engagement;
- analysing performance monitoring and patient experience by protected characteristics as required; and,
- provision of a programme of equality and diversity training for South staff and local organisations.

## **8. RESOURCES**

### **Accommodation**

Services are delivered across a wide range of locations in the South locality. Our vision is that we will focus our health and social care services around our four main centres in Gorbals, Castlemilk, Govan and Pollok supported by other smaller centres across the south. We will take forward a programme to improve our accommodation and support the delivery of integrated health and social care services to the people of South Glasgow. We have begun a major project to assess the scope for increasing clinical space, making better use of our non-clinical areas through the introduction of agile working, and improving facilities for staff and patients.

Work has commenced on a new health and care centre in the Gorbals to replace the existing Gorbals Health Centre, the Two Max building and the South Bank Centre for Specialist Children's services. This is due to be operational in early 2019. We have also begun to make significant moves in Rowanpark so that this becomes a hub for children's and families services serving the South West, and remodel Govan health centre and Elder Park Clinic as one of four bases in the South for our new integrated teams for older people. We are currently assessing space in both Castlemilk health centre and Castlemilk social work office to better support integration. During 2018/19 we will also be exploring options for a new HQ.

### **Human Resources**

We have a total of 1,841 staff working in the South – 1,288 NHS staff and 553 social work staff. We have undertaken a programme of staff engagement to raise awareness about integration and what it means for staff and teams, and the challenges facing the HSCP. Each care group has also undertaken staff engagement sessions to explore specific issues of relevance to them. Supporting staff through training and other personal development opportunities will be a priority for us going forward. We are also conscious of the current sickness absence rates for NHS and social work staff, are currently above target.

### **Finance**

The indicative budget for the locality in terms of net expenditure for 2018/19 is approximately £236.9m as shown below by care group.
